

GHK-Cu

100 mg · Copper tripeptide-1

GHK-Cu (Copper Tripeptide-1) is a copper-complex tripeptide supplied strictly for in-vitro laboratory research.

BATCH IDENTITY

PRODUCT	GHK-Cu	BATCH NO.	GHK-2607-007
STRENGTH	100 mg	MANUFACTURED	2026-07
APPEARANCE	Blue lyophilised powder	STORAGE	-20 °C, protect from light

ANALYTICAL RESULTS (HPLC)

TEST	SPECIFICATION	RESULT
Identity	Consistent with reference standard	Pass
Purity (HPLC)	≥ 99%	99% +
Appearance	Blue lyophilised powder	Conforms

PRODUCT SPECIFICATIONS

Research category	Copper tripeptide-1
Molecular formula	C14H24CuN6O4
Molecular weight	403.9 g/mol
CAS number	89030-95-5
Solubility	Soluble in bacteriostatic water
Packaging	100 mg / sterile amber vial
Storage	-20 °C, protect from light

For laboratory research use only. This material is supplied exclusively for in-vitro analytical characterisation and research. It is not intended for human or veterinary consumption, administration, diagnosis, treatment or therapeutic use. This certificate documents the identity and purity of the stated batch at the point of release.
