

Ipamorelin

10 mg · Synthetic pentapeptide

Ipamorelin is a synthetic pentapeptide supplied strictly for in-vitro laboratory research and analytical characterisation.

BATCH IDENTITY

PRODUCT	Ipamorelin	BATCH NO.	IPAM-2608-012
STRENGTH	10 mg	MANUFACTURED	2026-08
APPEARANCE	White lyophilised powder	STORAGE	-20 °C, protect from light

ANALYTICAL RESULTS (HPLC)

TEST	SPECIFICATION	RESULT
Identity	Consistent with reference standard	Pass
Purity (HPLC)	≥ 99%	99% +
Appearance	White lyophilised powder	Conforms

PRODUCT SPECIFICATIONS

Research category	Synthetic pentapeptide
Molecular formula	C38H49N9O5
Molecular weight	711.9 g/mol
CAS number	170851-70-4
Solubility	Soluble in bacteriostatic water
Packaging	10 mg / sterile amber vial
Storage	-20 °C, protect from light

For laboratory research use only. This material is supplied exclusively for in-vitro analytical characterisation and research. It is not intended for human or veterinary consumption, administration, diagnosis, treatment or therapeutic use. This certificate documents the identity and purity of the stated batch at the point of release.
