

Selank

5 mg · Synthetic heptapeptide

Selank is a synthetic heptapeptide analogue of tuftsin, supplied strictly for in-vitro laboratory research.

BATCH IDENTITY

PRODUCT	Selank	BATCH NO.	SEL-2608-015
STRENGTH	5 mg	MANUFACTURED	2026-08
APPEARANCE	White lyophilised powder	STORAGE	-20 °C, protect from light

ANALYTICAL RESULTS (HPLC)

TEST	SPECIFICATION	RESULT
Identity	Consistent with reference standard	Pass
Purity (HPLC)	≥ 99%	99% +
Appearance	White lyophilised powder	Conforms

PRODUCT SPECIFICATIONS

Research category	Synthetic heptapeptide
Molecular formula	C33H57N11O9
Molecular weight	751.9 g/mol
CAS number	129954-34-3
Solubility	Soluble in bacteriostatic water
Packaging	5 mg / sterile amber vial
Storage	-20 °C, protect from light

For laboratory research use only. This material is supplied exclusively for in-vitro analytical characterisation and research. It is not intended for human or veterinary consumption, administration, diagnosis, treatment or therapeutic use. This certificate documents the identity and purity of the stated batch at the point of release.
